Nordic Association for Clinical Physics
Radiological Physics Committee

Welcome to the NACP Course Applied patient dosimetry in diagnostic radiology

January 30 – February 1, 2012 in Gothenburg, Sweden

The course will cover aspects of applied patient dosimetry in diagnostic radiology for most modalities used in this field. The program will include topics of use and calibration of dose meters, dosimetry for advanced applications such as tomosynthesis and cone beam techniques, and risk assessment.

Headlines

- Dose quantities
- Dosimeter types and calibration
- Different modalities
- Interpretation of dose data
- Health effects and radiation risk
- Communication of risk

Registration and questions

For registration please visit our webpage

<https://www.delegia.com/app/attendee/default.asp?pagelId=19673&TemplatelId=6693>.

You can also contact our conference coordinator, Linda Jöfelt, 0046-31-7781130, linda.jofelt@easyconf.com.

Last date for registration as an Early bird is November 25.

Very welcome to Gothenburg, Sweden
